

Ruby - Bug #13039

build warning on 2.4-rc1

12/15/2016 07:02 PM - swills (Steve Wills)

Status:	Rejected	Backport: 2.1: UNKNOWN, 2.2: UNKNOWN, 2.3: UNKNOWN	
Priority:	Normal		
Assignee:			
Target version:			
ruby -v:			
Description When calling autoreconf -f -i, the following warning is generated: aclocal-1.15: warning: autoconf input should be named 'configure.ac', not 'configure.in' Renaming configure.in to configure.ac should do it and should be harmless.			
Related issues: Related to Ruby - Feature #13946: Rename configure.in to configure.ac			Closed

History

- Status changed from Open to Rejected

Use autoconf, not autoreconf.

#2 - 12/17/2016 03:04 AM - swills (Steve Wills)

Looks like the docs say to use configure.ac:

https://www.gnu.org/savannah-checkouts/gnu/autoconf/manual/autoconf-2.69/html_node/Writing-Autoconf-Input.html#Writing-Autoconf-Input

Or am I misunderstanding something?

Thanks!
