

Ruby - Bug #20217

void value not checked for begin/ensure/rescue

01/26/2024 06:52 PM - kddnewton (Kevin Newton)

Status:	Closed	
Priority:	Normal	
Assignee:		
Target version:		
ruby -v:		
		Backport: 3.0: UNKNOWN, 3.1: UNKNOWN, 3.2: UNKNOWN, 3.3: UNKNOWN
Description		
<pre>foo = begin return ensure end</pre>		
I would expect this to raise a syntax error for a void value expression being assigned, but the ensure makes it so that this isn't checked.
