

Ruby - Feature #3282

request: ability to step through *prelude

05/13/2010 12:18 AM - rogerdpack (Roger Pack)

Status:	Rejected	
Priority:	Normal	
Assignee:		
Target version:		
Description =begin Currently if you are running a debugger and are unlucky enough to try to step through code from gem_prelude (and friends), you hit something like (rdb) : n (no source available) (rdb) : n (no source available) (rdb) : n (no source available) It would be nice to be able to have line numbers and filenames associated with the prelude scripts so that you can do more than step through them blindly. Thanks!-rp =end

- Status changed from Open to Rejected

=begin
this is obsolete given the latest gem prelude behavior.
=end
