

Ruby - Bug #3324

build failure revision 27918

05/20/2010 09:31 PM - sapsford55 (david .sapsford)

Status:	Third Party's Issue	
Priority:	Normal	
Assignee:		
Target version:		
ruby -v:		
Backport:		
Description		
<pre>=begin they seem to have bumped the revision to 27918 and now it fails at ruby -I../ruby_1_9 ../ruby_1_9/tool/compile_prelude.rb ../ruby_1_9/ prelude.rb miniprelude.c ../ruby_1_9/tool/compile_prelude.rb:7:in require': no such file to load -- erb (Load Error) from ../ruby_1_9/tool/compile_prelude.rb:7:in 'make: *** [miniprelude.c] Error 1 rake aborted! Command failed with status (2): ["C:/rubyinstaller/sandbox/msys/bin/bash.ex...]</pre>		
<pre>However erb is present at ../ruby_1_9/bin Just to make sure I wasn't missing something I put that directory in my path with no avail. Looking at erb it contains "require erb" is that right it seems like a circular reference. =end</pre>		

History

#1 - 05/20/2010 11:53 PM - hdm (HD Moore)

```
=begin
I too am hitting this problem (using rubyinstaller and mingw32)
=end
```

#2 - 05/21/2010 04:55 AM - hdm (HD Moore)

```
=begin
The command line requires the addition of -I ../ruby_1_9/lib, however the build still fails generating encodings
=end
```

#3 - 05/21/2010 05:34 AM - hdm (HD Moore)

```
=begin
This is fixed upstream in rubyinstaller; git pull && rebuild
=end
```

#4 - 05/22/2010 02:01 PM - nobu (Nobuyoshi Nakada)

- Status changed from Open to Third Party's Issue

```
=begin
=end
```
