

Ruby - Bug #4517

ArgumentError when sorting array of objects

03/22/2011 08:14 PM - knirrr (Milo Thurston)

Status:	Third Party's Issue	
Priority:	Normal	
Assignee:		
Target version:		
ruby -v:	1.9.2p180	Backport:
Description =begin I've got some Rails (v. 3.0.4) code wherein an array of objects (referred to as 'Thing' here) need to be sorted: stuff = array of Things stuff.sort! {[a,b] a.value <=> b.value } ...where value is a String. On Ruby 1.9.2p136 the array "stuff" is sorted successfully, but running the same code on 1.9.2p180 I get the following error: ArgumentError (comparison of Thing with Thing failed) I can reproduce the error in the console as well as when running the Rails application. Thanks for taking a look. =end

Could you show the reproducible code?

```
=begin
I did some investigation into this. The following code does not trigger the error
class Thing
  attr_accessor :value

  def initialize(value)
    @value = value
  end
end

stuff = [Thing.new("Fred"), Thing.new("Wilma"), Thing.new("Barney")]
stuff.sort! {[a,b] a.value <=> b.value}
```

Reading through the Ruby source, I discovered that the only way this particular error text could be printed (in {{{rb_cmperr}}})) would be if there was a comparison involving a numeric value, not just string/string comparison. Then I tried modifying the input array above to include a numeric value.

```
stuff = [Thing.new(4), Thing.new("Wilma"), Thing.new("Barney")]
stuff.sort! {[a,b] a.value <=> b.value}
```

This does, in fact, trigger the error.

in `sort!': comparison of Thing with Thing failed (ArgumentError)

I think the OP must have had a bug in his own code that resulted in a numeric-typed value in one of the instances of Thing.
=end
