

Ruby - Bug #4686

test/rubygems/test_gem_package_tar_output.rb should require rubygems/security

05/13/2011 05:02 PM - sorah (Sorah Fukumori)

Status:	Closed	Backport:
Priority:	Normal	
Assignee:	drbrain (Eric Hodel)	
Target version:		
ruby -v:	ruby 1.9.3dev (2011-05-13 trunk 31542) [x86_64-darwin10.7.0]	

Description

Hi,

When run test-all with parallel option ("-j"), test_self_open_signed(TestGemPackageTarOutput) can be failed.

1. Error:

```
test_self_open_signed(TestGemPackageTarOutput):
NameError: uninitialized constant Gem::Security
/Users/sorah/git/ruby/ruby/test/rubygems/test_gem_package_tar_output.rb:61:in `test_self_open_signed'
```

Because if running test-all with -j, the running order of test files can be not equal to the order when running test-all without -j.

So, if the test expects that already 'openssl' or 'rubygem/security' is required before that test runs, we should fix to require 'rubygem/security' on the top of the test file.
