

Ruby - Bug #5365

WEBrick lacks the application/javascript and image/svg+xml MIME types.

09/26/2011 05:12 AM - postmodern (Hal Brodigan)

Status:	Closed	
Priority:	Normal	
Assignee:		
Target version:		
ruby -v:	-	
Backport:		
Description		
WEBrick::HTTPUtils::DefaultMimeTypes (webrick/httputils.rb) does not define MIME types for the file extensions 'js' and 'svg'. This forces projects that use WEBrick directly (such as Jekyll) to define these MIME types.

RFC3203 says SVG's MIME Type is image/svg+xml, isn't it?

I think you meant RFC 3023.

<http://www.ietf.org/rfc/rfc3023.txt>

No, that uses this just for an example. For the actual registration,

please see:
<http://www.iana.org/assignments/media-types/image/index.html> and
<http://www.w3.org/TR/SVG/mimereg.html>.

(For application/javascript, please see
<http://www.rfc-editor.org/rfc/rfc4329.txt> and
<http://www.iana.org/assignments/media-types/application/index.html>.)

Regards, Martin.

Bug #5365: WEBrick lacks the application/javascript and image/svg+xml MIME types.
