Ruby - Bug #5950

open-uri: https redirect fix

01/31/2012 12:33 AM - azet (Aaron Zauner)

Status:	Closed		
Priority:	Normal		
Assignee:	akr (Akira Tanaka)		
Target version:			
ruby -v:	ruby 1.8.7 (2011-06-30 patchlevel 352) [x86_64-linux]	**Backport:**	2.3: UNKNOWN, 2.4: UNKNOWN

Description

open-uri raises an exception if a http/s redirect refers to https.

original mail to the maintainer with a quickfix: https://gist.github.com/1704932

--snip--

this is taken from the original ruby open-uri class,

fixed this to support secure socket http redirects:

def OpenURI.redirectable?(uri1, uri2) # :nodoc:
# This test is intended to forbid a redirection from http://... to
# file:///etc/passwd.
# However this is ad hoc. It should be extensible/configurable.
uri1.scheme.downcase == uri2.scheme.downcase ||
(/\A(?:http|ftp|https)\z/i =~ uri1.scheme && /\A(?:http|ftp|https)\z/i =~
uri2.scheme)
end
--snip--
