| ruby -v: | ruby 1.9.3p125 (2012-02-16 revision 34643) [x86_64-linux] | Backport: 2.3: UNKNOWN, 2.4: UNKNOWN |
| Description <p>While checking on this issue https://gist.github.com/1981223 I found out that Etc.sysconfdir is inconsistently behaving between Linux and Windows.</p> <p>This issue is related to rubygems also: https://github.com/rubygems/rubygems/pull/291</p> <p>On linux you can change sysconfdir with: --sysconfdir --prefix and the calculated path will be available for rubygems and via Etc.sysconfdir</p> <p>But on Windows users have no option to force a sysconfdir, they will always use default location (~ C:\Documents and Settings\All Users\Application Data).</p> <p>Also this is not consistent to the documentation header for this function.</p> <p>Is this intended behavior ?</p> <p>I could see few occasions where it should be supported to allow switching to system location even --prefix / --sysconfdir was used, but this should be rather configurable not a forced setting.</p> <p>Even if this is not being implemented/fixed could I get a statement if it is good for rubygems to follow Etc.sysconfdir behavior or it should rather using RbConfig::CONFIG['sysconfdir'] ?</p> | | |

History

#1 - 03/07/2012 10:25 PM - naruse (Yui NARUSE)

- Status changed from Open to Assigned
- Assignee set to usa (Usaku NAKAMURA)

#2 - 10/31/2012 04:30 PM - usa (Usaku NAKAMURA)

- Category set to build
- Priority changed from 3 to Normal
- Target version set to 2.0.0

#3 - 02/18/2013 09:30 PM - mame (Yusuke Endoh)

- Target version changed from 2.0.0 to 2.6

Postponing it to next minor.
Usa-san, let me know if you think it is a significant issue.
