

Ruby - Bug #6283

Segmentation fault pg_ext.bundle

04/12/2012 01:42 PM - patrickberkeley (Patrick Berkeley)

Status:	Closed		
Priority:	Normal		
Assignee:	sorah (Sorah Fukumori)		
Target version:			
ruby -v:	ruby 1.9.3p125 (2012-02-16 revision 34643) [x86_64-darwin11.3.0]	Backport:	2.3: UNKNOWN, 2.4: UNKNOWN, 2.5: UNKNOWN
Description <i>Steps to reproduce:</i> 1. rvm reinstall 1.9.3 --with-openssl-dir=/usr/local 2. Install a Rails project that uses 1.9.3 3. rake -T <i>Result of ruby -v:</i> ruby 1.9.3p125 (2012-02-16 revision 34643) [x86_64-darwin11.3.0] <i>Expected outcome:</i> A list of available rake tasks. <i>Crashlog</i> https://gist.github.com/4af6b734324260df098a

- Status changed from Open to Feedback

What is "a Rails project" ?

Anyway it seems Third Party's Issue.

#2 - 04/13/2012 09:57 AM - drbrain (Eric Hodel)

This ticket has roughly the same stack trace as [#6281](#)

#3 - 11/05/2012 08:58 PM - mame (Yusuke Endoh)

- Status changed from Feedback to Assigned

- Assignee set to sorah (Sorah Fukumori)

- Target version set to 2.0.0

I guess [#7089](#) is the same cause.

[#7089](#) has the console log which shows that an error occurred in "require".

[#6283](#) has only the CrashReporter log, so I can't determine where an error occurred, but I guess that the point is "require", because OP just invoked rake.

I guess that os x's pg_ext binary has something inconsistent. Sorah, can you investigate this?
