

## Ruby - Bug #7153

### IMAP: emails with (BODY ("MIXED")) returned from fetch fail to parse

<b>Description</b>		<b>Backport:</b>
<p>I'm not sure if this is even valid IMAP (I couldn't find a reference to it in the RFC), but Google's IMAP server seems to return these occasionally. Found a message in my Inbox that wouldn't parse because of this.</p> <p>I've added a test and fixed the module. Will post the pull request here right away.</p>

OK, the patch for this will have conflicts with the patches for [#7145](#), [#7146](#), and [#7147](#) because it also adds unit tests to test\_imap\_response\_parser.rb. I'm not sure what the best approach is for this... Whether to wait until that pull request is accepted and do a second one, or to just add this fix into the original pull request.
