Ruby - Bug #7667

Should Refinements be enabled by default?

01/07/2013 12:55 PM - shugo (Shugo Maeda)

Description

Currently, `require "refinement"` is needed to use Refinements, but I've heard from Matz that he wants Refinements to be enabled by default.
Is it right, Matz?

If so, I'm worried that other implementors might not want to enable Refinements by default, because it's an experimental feature.

Correct. I think we don't have to worry about other implementations if it's marked as EXPERIMENTAL in the NEWS file.

Matz.

I think a warning should be shown when Module#refine or main.using is called at the first time.
