We should also compare inode of @filename and @dev, right?

The following patch works fine for me.

```
diff --git a/lib/logger.rb b/lib/logger.rb

- Status changed from Open to Assigned

- Assignee set to naruse (Yui NARUSE)

- Backport changed from 1.9.3: UNKNOWN, 2.0.0: UNKNOWN to 1.9.3: DONTNEED, 2.0.0: DONTNEED

This issue seems introduced by r43511. So I assign this to naruse san.

No. This bug is what logger.rb has been having for a long time.
The above patch fixes the newly implemented method for simplicity.
The actual problem is [#9133](#). Updated patch is also available there.
Please see to it.

Yes, I saw [#9133](#) after I've written the previous comment.

Anyway, this ticket should be opened for trunk. We have to handle these issues separately.
