

Ruby - Bug #12727

Segfault when subclassing Thread with bad initialize

09/06/2016 12:28 PM - sandal (Gregory Brown)

Status:	Rejected	Backport: 2.1: UNKNOWN, 2.2: UNKNOWN, 2.3: UNKNOWN
Priority:	Normal	
Assignee:		
Target version:		
ruby -v:	2.3.0p0	
Description		
I imagine that this is a really unlikely problem to encounter in real code, but...		
<pre>class MyThing < Thread def initialize raise end end MyThing.new do loop do puts "hello" sleep(1) end end sleep</pre>		
Produces a segfault for me, and I've had someone else confirm as well.
