

Ruby - Feature #18925

Add `FileUtils.ln\_sr` to create symbolic links relative to link location

07/19/2022 08:53 AM - nobu (Nobuyoshi Nakada)

Status:	Closed	
Priority:	Normal	
Assignee:		
Target version:		
Description Usual File.symlink (and ln -s) creates a symbolic link as the given argument. GNU coreutils ln has -r (--relative) option, which resolves the source path relative to the current directory as relative to the link location. <pre>\$ mkdir src dest \$ echo ok > src/x \$ ln -s src/x dest \$ readlink dest/x src/x \$ cat dest/x cat: dest/x: No such file or directory \$ rm dest/x \$ ln -sr src/x dest \$ readlink dest/x ../src/x \$ cat dest/x ok</pre>
