For the time being, how about using rubylang/ruby image?

<https://hub.docker.com/r/rubylang/ruby/>

Currently, there is no core developer in Ruby responsible for alpine (or musl) support. Therefore, I don't think there is currently anyone who can answer this ticket.

I set this to Feedback status for now. If there is a core developer or contributor interested in investigating the issue and suggesting a patch, please feel free to change it.
