Ruby - Bug #21312

ruby 3.5-dev installs a gemspec for rdoc that misses dependencies

Description

Similarly to https://bugs.ruby-lang.org/issues/20581, installing ruby 3.5-dev installs a gemspec for rdoc that it's missing its own dependency on psych.

This causes issues when using Bundler, as reported at https://github.com/rubygems/rubygems/issues/8637.

I created a workaround in Bundler to behave better under this situation and print a warning rather than creating an incorrect lockfile, but ruby installer should fix this too.

Thank you!

Thanks! I confirmed psych was removed from rdoc dependency. I'll look that.
