

Ruby - Bug #3842

REXML gives NoMethodError when using parentheses in Xpath selection criteria

09/17/2010 04:00 AM - halfgaar (Wiebe Cazemier)

Status:	Closed	Backport:
Priority:	Normal	
Assignee:	kou (Kouhei Sutou)	
Target version:		
ruby -v:	ruby 1.9.2p0 (2010-08-18 revision 29036) [x86_64-linux]	
Description		
<pre>=begin</pre> When using a selection criterion as follows: <pre>xml.doc.elements.each("descendant::node()[(local-name()='link' or local-name()='a') and @rel='sub']")</pre> It gives: <pre>/usr/lib/ruby/1.9.1/rexml/xpath_parser.rb:437:in `expr': undefined method inject' for true:TrueClass (NoMethodError)</pre> But when leaving out the parentheses around two two local-name functions, it works fine. It also worked fine on Ruby 1.8. <pre>=end</pre>		

History

```
=begin
I've fixed it in trunk.

Thanks for reporting!
=end
```
