I told RDoc how to find the documentation for PTY::ChildExited like this:

/*

- Document-class: PTY::ChildExited

- Thrown when PTY#check is called for a pid that represents a process that
- has exited.
  */

#3 - 05/24/2011 09:54 PM - mame (Yusuke Endoh)

- Status changed from Closed to Open

Hello,

```
raise_from_check(cpid, status);
```

- return Qnil;   /* not reached */

- return Qnil;

Please do not remove such a comment in a document patch.

raise_from_check always raises an exception, so this
return statement is not reached actually.

Oops! I meant to keep the "not reached" comment when I reviewed this diff but it slipped my mind when I applied it.
