

Ruby - Bug #6489

A File instance changes its class to IO

05/24/2012 09:28 PM - yimutang (Joey Zhou)

Status: Rejected Priority: Normal Assignee: Target version: ruby -v: ruby 1.9.3p194 (2012-04-20 revision 35410) [i686-linux]	Backport:
Description I don't know whether it is a bug, or a feature. 1.9.3p194 :001 > f = open('xxx','w') => #File:xxx 1.9.3p194 :002 > f.class => File 1.9.3p194 :003 > f.id => 80452110 1.9.3p194 :004 > f.reopen(STDOUT) => #<IO:> 1.9.3p194 :005 > f.class => IO 1.9.3p194 :006 > f.id => 80452110 You see, an object(id:80452110) changes its class from File to IO. Is it ok?	

History

- Status changed from Open to Rejected

OK.

#2 - 05/25/2012 12:23 AM - mame (Yusuke Endoh)

Hello,

2012/5/24 yimutang (Joey Zhou)

You see, an object(id:80452110) changes its class from File to IO.

Is it ok?

FYI: The rdoc of IO#reopen says:

- call-seq:
-
-
- Reassociates *ios* with the I/O stream given in
- *other_IO* or to a new stream opened on *path*. This may
- dynamically change the actual class of this stream.
