Description

WIN32OLE has no support for VT_RECORD VARIANTS. Python and Perl use the functions GetRecordInfoFromTypeInfo and GetRecordInfoFromGuids to add support for VT_RECORD and the IRecordInfo interface.

suggest having a class IRecordInfo and support for generating a Class for the UDT to use this Record/Struct in ruby

The method starting on 1395 needs a case statement for VT_RECORD and a way to turn that into a IRECORD class

```
static void *
get_ptr_of_variant(VARIANT *pvar)
{
switch(V_VT(pvar)) {
case VT_UI1:
return &V_UI1(pvar);
break;
```

The IDL definitions for the methods are as follows

```
HRESULT GetRecordInfoFromTypeInfo(
__in ITypelib *pTypeLib,
__out IRecordInfo **ppReclInfo
);
```

```
HRESULT GetRecordInfoFromGuids(
__in REFGUID rGuidTypeLib,
__in ULONG uVerMajor,
__in ULONG uVerMinor,
__in LCID lcid,
__in REFGUID rGuidTypeInfo,
__out IRecordInfo **ppReclInfo
);
```

here is the CTYPES definition for python that adds this support

```
class IRecordInfo(IUnknown):
# C:/vc98/include/OAIDL.H 5974
iid = GUID("{0000002F-0000-0000-C000-00000000046}")

def GetFieldNames(self, *args):
    count = c_ulong()
    self.__com_GetFieldNames(count, None)
    array = (BSTR * count.value)()
    self.__com_GetFieldNames(count, array)
    result = array[:]
    # XXX Should SysFreeString the array contents. How to?
    return result
```

```
IRecordInfo.methods = [
COMMETHOD([], HRESULT, 'RecordInit',
(['in'], c_void_p, 'pvNew')),
COMMETHOD([], HRESULT, 'RecordClear',
(['in'], c_void_p, 'pvExisting')),
COMMETHOD([], HRESULT, 'RecordCopy',
```

```

(['in'], c_void_p, 'pvExisting'),
(['in'], c_void_p, 'pvNew')),
COMMETHOD([], HRESULT, 'GetGuid',
(['out'], POINTER(GUID), 'pguid')),
COMMETHOD([], HRESULT, 'GetName',
(['out'], POINTER(BSTR), 'pbstrName')),
COMMETHOD([], HRESULT, 'GetSize',
(['out'], POINTER(c_ulong), 'pcbSize')),
COMMETHOD([], HRESULT, 'GetTypeInfo',
(['out'], POINTER(POINTERTYPEINFO), 'ppTypeInfo')),
COMMETHOD([], HRESULT, 'GetField',
(['in'], c_void_p, 'pvData'),
(['in'], c_wchar_p, 'szFieldName'),
(['out'], POINTER(VARIANT), 'pvarField')),
COMMETHOD([], HRESULT, 'GetFieldNoCopy',
(['in'], c_void_p, 'pvData'),
(['in'], c_wchar_p, 'szFieldName'),
(['out'], POINTER(VARIANT), 'pvarField'),
(['out'], POINTER(c_void_p), 'ppvDataCArray')),
COMMETHOD([], HRESULT, 'PutField',
(['in'], c_ulong, 'wFlags'),
(['in'], c_void_p, 'pvData'),
(['in'], c_wchar_p, 'szFieldName'),
(['in'], POINTER(VARIANT), 'pvarField')),
COMMETHOD([], HRESULT, 'PutFieldNoCopy',

Suketa-san, would you please comment to it?

#2 - 11/20/2012 11:13 PM - mame (Yusuke Endoh)

- Target version set to 2.6

#3 - 01/30/2014 02:47 AM - dsisnero (Dominic Sisneros)

Still no progress on this?? I wish I knew C better

#4 - 07/31/2014 01:31 PM - suke (Masaki Suketa)

Sorry for waiting too long. I had implemented VT_RECORD / IRecordInterface features.
Try WIN32OLE_RECORD class in ruby-trunk (2.2.0dev revision 47020 or later).
