

Ruby - Bug #824

st.h requires stdlib.h

12/05/2008 08:25 AM - felippec (Felipe Contreras)

Status:	Closed	
Priority:	Normal	
Assignee:	nobu (Nobuyoshi Nakada)	
Target version:		
ruby -v:		
Backport:		
Description		
=begin st.h is using size_t which is defined in stdlib.h. Compilation fails when using st.h directly. That happens in libxml-ruby for example. =end		

History

=begin
Another option is to use stddef.h.

Hi Felipe,

An aside, but libxml-ruby shouldn't be using st.h anymore (it did for a release but I took it out). Will check the header files to make sure.

FYI - the code that I did have in failed on 64bit machines, most likely because of this incorrect typecase. I can dig up the code if needed, its in the svn repository for libxml-ruby.
=end

#3 - 12/05/2008 09:16 PM - ko1 (Koichi Sasada)

- Assignee set to nobu (Nobuyoshi Nakada)
